<p>Q2. Item 313(1) - Asphalt Restoration.</p>																		

<p>May we know the thickness of the existing asphalt pavement? There is no data on the existing pavement. Actual coring is one way to determine it but at this time I think this will not be allowed. Referring to an as-built plan is the best way to determine its thickness.</p>	<p>Asphalt pavement in BGC has a uniform thickness of 100 mm.</p>
<p>Q3. We understand that we are going to connect these Street Lights to existing Lighting Contactor Panel, and therefore there is no need for us to install a new circuit breaker and controls such as a magnetic contactor, timer switch, etc. Please clarify.</p>	<p>Installation of new circuit breaker, control, and other fixing accessories is necessary to connect the street lights.</p>
<p>Q4. May we request information on how the recoupment will be applied?</p>	<p>The advance payment shall be recovered by deducting from the progress payments an equivalent percentage of the advance payment until it is fully liquidated within the duration of the contract.</p>
<p>Q5. May we be also clarified if there is a certain accomplishment percentage required before we could apply for the first billing?</p>	<p>There is none. The winning Contractor may submit a request for payment for Work accomplished, subject to verification and certification of BCDA's designated project representative.</p>
